# ACRYLIC PAINT POURING PROGRAM

MAKE STUNNING ART  
WITHOUT A PAINTBRUSH!

# PAINT POURING 101

DecoArt's Acrylic Paint Pouring Program enables anyone, from the novice crafter to the expert artist, to create unique pieces by layering and pouring acrylic paints onto almost any surface.

## Pouring Medium to Paint Mixing Ratios

Mix paint following these ratios, each color should be mixed with medium in a separate cup.

### Fluid Acrylics

2 parts paint  
1 part medium

### Craft Acrylics

1 part paint  
1 part medium

### Medium-Body Acrylics

1 part paint  
3 parts medium

## Puddle Pour Method

Use this method for all sized canvases. Pour paint from multiple cups to fill your surface with fun, vibrant art!

1. Mix individual colors with DecoArt® Pouring Medium™ based on recommended ratios
2. Pour individual color mixtures directly onto the surface, layering them on top of each other in one puddle
3. Tilt surface until all is covered with paint

## Flip Cup, Dirty Pour Method

Use this method for small to medium sized canvases. Paints mix as they leave the cup, creating unique results with every pour!

**1** Mix individual colors with DecoArt® Pouring Medium™ based on recommended ratios

**2** Combine colors into one cup, pouring slowly to layer the colors and avoid overmixing

**3** Place surface face down on top of cup and flip over

**4** Lift cup and tilt surface until all is covered with paint

## Finish with Clear Pouring Topcoat

Finish your poured art with a lacquer-like, high-end finish using DecoArt® Clear Pouring Topcoat™.

1  
Pour over dry,  
painted surface

2  
Tilt surface for even coverage and  
drain off excess to prevent pooling

3  
Smooth out sides with a  
palette knife or brush

4  
Place at a 45° angle and  
allow to air dry overnight

*OPTIONAL: If a thicker finish is desired, apply a second coat and place surface at the opposite 45° angle*
