DecoArt POURING
MEDIUM

MAKE STUNNING ART WITHOUT A PAINTBRUSH!
1. Mix individual colors with DecoArt® Pouring Medium™ based on recommended ratios

2. Pour individual color mixtures directly onto the surface, layering them on top of each other in one puddle

3. Tilt surface until all is covered with paint

DecoArt’s Acrylic Paint Pouring Program enables anyone, from the novice crafter to the expert artist, to create unique pieces by layering and pouring acrylic paints onto almost any surface.

### Pouring Medium to Paint Mixing Ratios

Mix paint following these ratios, each color should be mixed with medium in a separate cup.

- **Fluid Acrylics**: 2 parts paint to 1 part medium
- **Craft Acrylics**: 1 part paint to 1 part medium
- **Medium-Body Acrylics**: 1 part paint to 3 parts medium

### Puddle Pour Method

Use this method for all sized canvases. Pour paint from multiple cups to fill your surface with fun, vibrant art!
Flip Cup, Dirty Pour Method

Use this method for small to medium sized canvases. Paints mix as they leave the cup, creating unique results with every pour!

1. Mix individual colors with DecoArt® Pouring Medium™ based on recommended ratios.

2. Combine colors into one cup, pouring slowly to layer the colors and avoid overmixing.

3. Place surface face down on top of cup and flip over.

4. Lift cup and tilt surface until all is covered with paint.
Finish with Clear Pouring Topcoat

Finish your poured art with a lacquer-like, high-end finish using DecoArt® Clear Pouring Topcoat™.

1. Pour over dry, painted surface

2. Tilt surface for even coverage and drain off excess to prevent pooling

3. Smooth out sides with a palette knife or brush

4. Place at a 45° angle and allow to air dry overnight

OPTIONAL: If a thicker finish is desired, apply a second coat and place surface at the opposite 45° angle
